Mr. Ralph Plankinton, Secretary
San Jose Amateur Astronomers
10649 Gascoigne Drive
Cupertino, California

Dear Mr. Plankinton:

Dr. Leonard Kuhi of our department has agreed to give a Morrison Lecture to the San Jose Amateur Astronomers on Monday, November 1. I find that an October date is entirely out of the question.

May I suggest that you write to Dr. Kuhi regarding the topic of his lecture, and the time and place of meeting. Dr. Kuhi would be willing to give you a lecture on the solar system if you insist, although his special field of interest is the topic of variable stars. I shall leave the choice of topic to the two of you.

If this arrangement works out, all that I would need from you would be a further letter after the lecture has been given. This letter should give some indication of the size of the audience and the reception of the talk. The letter should also include a \$10.00 check payable to the Astronomical Society of the Pacific to assist in the defrayment of Dr. Kuhi's travel expenses.

You asked about the number of Morrison Lectures your club is eligible to receive each year. Ordinarily this is limited to two--one during the fall months, and one in the spring. Should you wish to have a spring Morrison Lecture, please give me at least one month notice.

If you have any further question regarding arrangements for Dr. Kuhi's lecture, please let me know.

Sincerely yours,

John G. Phillips
Chairman

ASK DR. KUHI TO CONCENTRATE ON
