

## *Predictions*

MAY IN THE YEAR 1978

- Apr. 29 Indoor star party, Los Gatos Red Cross, 7:00 pm.
- May 2 Sun Day, Rosicrucian Planetarium, see Blurb section for more information.
- May 5&6 AANC star party at Fremont Peak. West Valley College Astronomy classes will be there.
- May 6 Club star party at Henry Coe Park, dusk to dawn.
- May 12 Board of Directors Meeting, 8:00 pm.  
Dr. Gregory's, 5480 Fairway Dr. San Jose.
- May 13 General Meeting, Rosicrucian Planetarium, Park and Naglee, San Jose. Lori Warren will give a planetarium orientation and show the currently running program about Ancient Egypt.
- May 20 Indoor star party, Los Gatos Red Cross, 7:00 pm.
- May 27 Indoor star party, Los Gatos Red Cross, 7:00 pm.
- May 27-29 Riverside Telescope Makers Conference, Big Bear. For more information, ask Jack Zeiders or Gerry Rattley.
- Jun. 2&3 Club and AANC sponsored star party at Fremont Peak State Park.
- Jun. 10 Indoor star party, Los Gatos Red Cross, 7:00 pm.
- Jun. 17 General Meeting, Rosicrucian Planetarium, Park and Naglee, San Jose. Speaker to be announced. Election night.
- Jun. 23 Board of Directors Meeting, 8:00 pm.  
Jack Zeiders' house, 725 Minnesota Av. San Jose.
- Jun. 30&31 AANC sponored star party at Fremont Peak.

**The San Jose Astronomical Association**

## Rambling Rhodes

As announced in the PREDICTIONS section, this month's meeting will be held at the Rosecrucian Planetarium building in San Jose. The move is the result of several months planning and coordinating spearheaded by Gerry Rattley, and we are all pretty excited about the prospects.

The board has for some months wanted to build a relationship between the SJAA and some respected institution in the greater San Jose area. Our dream was to find an organization which could provide us with a meeting place, and which would benefit from our enthusiastic programs in astronomy. Our first attempt at such a coupling was with the University of Santa Clara -- their fine telescope and observatory building seemed ideal for a mutually beneficial program. Unfortunately, the funds were not available at the University to staff the facility properly, so our plan went begging.

Then Gerry talked with Don and Lori Warren at the Rosecrucian. Our proposal to use the planetarium as the meeting room was warmly welcomed, and we have already begun to see the benefits of the association: Astronomy Day was a resounding success, with the planetarium shows and the SJAA telescopes complementing one another. This coming meeting will feature Lori Warren presenting the planetarium projector and giving us their currently featured show. In addition, the Rosecrucian organization is well known within the south bay area and has effective contacts with the local news media. They are members of the AANC and have a good understanding of astronomical phenomenon and their potential influence on SJAA activities and requirements.

Use of the Rosecrucian planetarium did however require another change: The planetarium is not available to the SJAA on Friday evenings since that evening is reserved for public shows. A straw poll of the membership suggested that Saturday evening would be preferred to a week night, so that evening was designated by the board for the new general meeting night. In addition, since we were already confusing everyone by changing the place and the day, we have also instituted one more change. The meeting night will NOT necessarily be the first Saturday of the month; the Saturday selected will be one which most closely corresponds to the Saturday following the 1st-quarter moon. This rule prevents the annoying (and often protracted) conflict between general meeting nights and evenings of prime-time viewing.

The meeting nights will always be scheduled definitely 3 months in advance -- and published in the BULLETIN. In addition, our club "Keeper of the Calendar" (currently Jim Van Nuland) will prepare a pro forma calendar one year in advance for you long-range planners.

The new meeting-night schedule should be a boon to those active members who have been waiting this long winter out looking for a clear night; it also follows the format set long ago by some of the East Coast astronomy clubs. See you at the Planetarium.

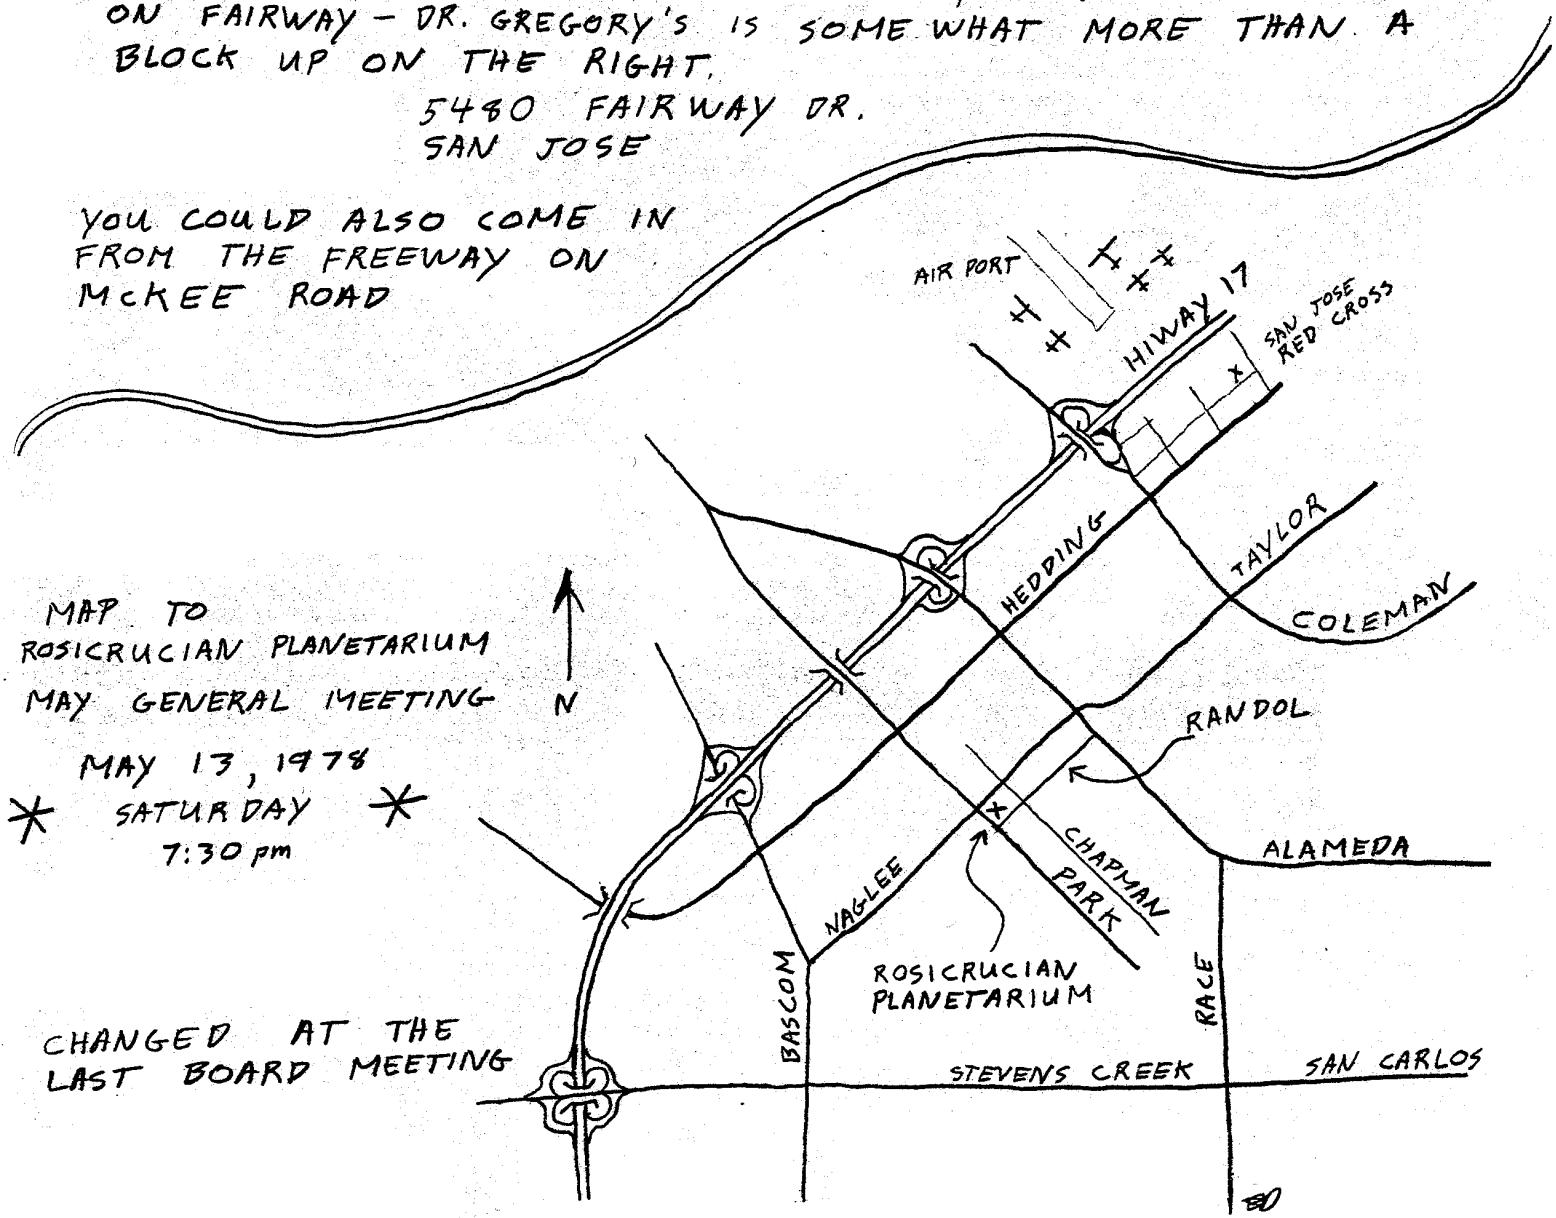

DIRECTIONS TO FREMONT PEAK STATE PARK  
GO SOUTH ON HIWAY 101 FROM GILROY -  
TAKE HIWAY 156 EAST TO SAN JUAN BAUTISTA -  
AT THE FLASHING YELLOW LIGHT TURN  
RIGHT AND FOLLOW THE SIGNS ALL THE  
WAY UP THE HILL. THE PARK IS AT THE  
VERY END OF THE ROAD. BE CAREFUL

DIRECTIONS TO DR. GREGORY'S HOME FOR THE MAY  
BOARD MEETING, MAY 12 FRIDAY AT 8:00 pm.

GO EAST ON ALUM ROCK AVE. FROM 680 - JUST A FEW BLOCKS  
BEFORE MOUNT HAMILTON ROAD, TURN LEFT (NORTH) ON  
MCKEE ROAD AND GO ABOUT 3 BLOCKS, THEN TURN RIGHT  
ON FAIRWAY - DR. GREGORY'S IS SOMEWHAT MORE THAN A  
BLOCK UP ON THE RIGHT.

5480 FAIRWAY DR.  
SAN JOSE

YOU COULD ALSO COME IN  
FROM THE FREEWAY ON  
MCKEE ROAD

Wanted: reporters, good writers willing to write for the bulletin. You, yes, you can actually be published in your famous club bulletin. All you need is imagination and the willingness to do something good for someone (mainly me, as well as your fellow club members.) I need people to write about star parties, interesting Red Cross events, guest editorials, astronomical news past and present, stories about active club members, even astronomical word games or crossword puzzles! Almost anything will be good, but nothing won't. So, please, write something for the bulletin.

---

Here are some of the more usable quotes, most of which are from the last board meeting on April 14th.

"Jack has a neat way of phrasing things, doesn't he?" John Rhodes

"We'll do anything for the sake of an argument." Jack Zeiders

"Those of you who think you know everything get in the way of those of us who do." Ed Schell

"This is a zoo." John Rhodes

"4565 doesn't look so good on an egg." Gerry Rattley

"Ed is actually good at something." Jack Zeiders

---

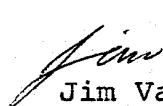

#### Red Spot Predictions

The Spot is tracking close to the predictions, mostly gray or light yellow, not hard to detect if seeing is very good. These are the last timings to be published for this apparition. Recovery will be attempted in August.

Dark Skies; *Bernard W. Rattley*

## Blurbs

The week of May 1 through 6 has been named Sun Week. On Tuesday, May 2, Sun Day, the Rosicrucian Planetarium will have telescopes set up between 2:00 and 6:00 p.m. Come if you can and bring your telescope if it has a sun filter or projection system. The planetarium will also have a show going on inside. For more information call Gerry Rattley.

A nominating committee was formed at the April 14th board meeting for the upcoming election in June. There will be 4 slots to fill on the board. The committee members are Cathy Pinheiro, Bob Fingerhut, Jim Van Nuland and Jack Zeiders. Have you thought about who you want for board members?

Dr. Gregory volunteered to be Banquet Chair(person) with John Rhodes and Jack Zeiders as assistants. If you have any suggestions as to a banquet site for our July meeting tell any of the above. The Board is looking at a cost range of about \$7 per person.

Information about the Riverside Telescope Makers Conference on May 27-29 will be available at all Red Cross and General Meetings.

If anyone is interested in blinking (see last month's article by Jeff Lo) I have the questionnaire that needs to be filled out if you would like to blink. Please call me or get in touch with Jeff.

When Gerry Rattley was telling about his information on the Rosicrucian Planetarium at the last board meeting he was so enthusiastic that he even took off his cap!

### ANNOUNCEMENT

There may be some unannounced indoor star parties at the Los Gatos Red Cross. When the Board makes up its mind about General Meeting dates, indoor star parties will be scheduled every Saturday that something else isn't going on. If not sure, call Ed Schell.

## History

On March 25th (Easter Eve) at the Red Cross, we had an astronomical egg decorating contest. Out of a dozen entries, Jeff Lo won. All on one little egg he managed to skillfully draw the never-ending scene of some poor fellow trying to look through his telescope with car headlights shining bright in his direction. Jeff walked away with all twelve eggs as his prize.

Nothing much happened at the first AANC sponsored star party at Fremont Peak. On Friday I was not there and neither were many others. Saturday afternoon I did hear from Les Delong that despite it being a bit cool ( $33^{\circ}$ ) the seeing was halfway decent Friday night. Later on Saturday, a bunch of us went to the site behind the ranger's house. I won't mention all the names, just a few, like Larry Webster, Pete Arebalo and friend, and last as well as least, Jack Zeiders. The big event happened around 1:00 a.m. on Sunday. Ed Schell happened to glance down into the valley and saw a raging fire in Hollister. It looked like half the town was burning. Pete swung his Questar around and we were able to watch the flames with it. The most exciting sight seen through the telescopes all night! Later that day, Ed and I detoured to Hollister on our way home. Found out it was only a ware-house or lumber yard on fire, not the whole town!

On April 11th there was an unannounced graze expedition down south of Gilroy. Jim Van Nuland, Gerry Rattley, Ed Schell and I were the only observers. Jim wasn't expecting much excitement; hence, no prior publicity. By 8:15 p.m. all was ready. At 8:30 all was over. Ed and I saw little through the 3" refractor, partly due to poor seeing. Jim and Gerry did better, but nothing earth shattering (or rather moon shattering.) If you want more details, ask Jim. I'm getting lazy and tempermental in my old age, so I won't say much more about it. Afterwards, all of us met at Jim's VW bus at his station on the side of the road. We talked, had hot drinks, and ate Gerry's Oreo cookies by the light of defective road flares that Ed had!

---

The April 7th general meeting was commenced with a suggestion that we move our meeting place from Mark Twain to the Rosicrucian Planetarium. The only problem is that Friday evenings are not available there. So which night would we have our meetings? Saturday?

The preliminaries concluded, Mike Ryan of the San Mateo County Astronomical Society gave a detailed talk about the 11-day Sitmar cruise last October, which included a total solar eclipse. His comments on scientific and typical cruise activities were all illustrated by many slides. (When is the next solar eclips cruise, Mike?)

For refreshments, Cathy Pinheiro brought out a birthday cake for Penny Punschmidt, which was enjoyed by all. Happy birthday 4 days late, Penny.

Suzanne Lowd  
Staff Reporter

## *Editorial*

Every now and then I get to feeling sorry for myself in regards to the Bulletin. I feel that many people do not realize the time and work that goes into producing these nine pages everyone gets each month. True, I enjoy being editor, but there are certain things I don't enjoy. Like, when someone says they are going to write me something, and at the last minute, after I have planned on it and left space for it, they back out. Other times everything comes to a standstill while I wait for one person to give me what I need to complete the Bulletin. Then there's the problem of getting material - people do not want to write anything, or they're too busy..... They like getting a nice bulletin every month, but to help? ...No thanks.....

On top of it all, I have a publishing problem. The Bulletin gets xeroxed at Los Gatos Office Equipment. They do a good job and it's cheap. But every time I walk in that door with my finished nine pages, the machine breaks down. I either have to wait up to a day and a half or go some place else. One month I tried San Jose Blue Print. They were more expensive and the quality was poor. So, people are not always the problem.

Luckily, I have some very appreciated faithfules: Gerry Rattley, always on time and often early, Jim Van Nuland, eager to do nearly anything, Suzanne Lowd, my trusty, one-and-only staff reporter. It's people like them, and others I didn't even mention, who really make this bulletin.

So, when your Bulletin arrives late, think of a broken-down copy machine in Los Gatos, or one or two people who didn't go through with their promises, or others who keep me waiting. This month, May, things are going to change. I will be calling people, everyone I can, to contribute to the Bulletin. I want to get as big a backlog of articles and information that I possibly can. Sometime soon, don't be surprised if you get a call from me asking for your help.

*Penny E. Fincham*
